Section 2: EX-99.1 (INVESTOR UPDATE 04.10.18)

Exhibit 99.1
Investor Update
April 10, 2018

This investor update provides Spirit's first quarter 2018 guidance and a recast of certain 2017 financial information in accordance with the adoption of Accounting Standards Update (ASU) No. 2014-09, (ASU 2014-09), "Revenue from Contracts with Customers." Guidance data is based on preliminary estimates.

Total revenue per available seat mile (TRASM) for the first quarter 2018 is estimated to be approximately 8.37 cents, down approximately 2.4 percent compared to first quarter 2017 recast TRASM of 8.58 cents. This result is near the low end of our previous guidance range, partially due to a better than expected completion factor.

Adjusted cost per available seat mile ex-fuel (CASM ex-fuel) for the first quarter 2018 is expected to be down approximately 5.0 percent year over year which is better than previously expected, largely due to better operational performance. In addition, due to the timing of certain maintenance events, depreciation and amortization is expected to be better than anticipated by approximately \$1 million.

Earlier this month, the Company announced the purchase of 14 A319 aircraft which are currently operated under lease arrangements. As a result of this transaction, the Company now estimates its 2018 full year CASM ex-fuel will be down between 3 and 4 percent year over year.

ASU 2014-09 establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers (see Note 2 of our Consolidated Financial Statements within the Form 10-K filed on February 13, 2018). The adoption of the ASU impacted the classification and timing of recognition of certain ancillary items such as bags, seats and other travel-related fees, since they are deemed part of the single performance obligation of providing passenger transportation. These ancillary items are now recognized in passenger revenue (disclosed below as non-fare passenger revenue). Other revenue primarily consists of the marketing component of the sale of frequent flyer miles to our credit card partner and revenue from the sale of various items such as hotels and rental cars. In addition, the adoption of the ASU eliminated the incremental cost method for frequent flier program accounting, which required the Company to re-value and record a liability associated with customer flight miles earned as part of the Company's frequent flier program with a relative fair value. This change did not have a material impact on our income statement or balance sheet in any period presented.

The following table provides additional detail about the components of non-ticket revenue:
